

# STOW PROTON GUN UPGRADE

## by partworkupgrades

Once each proton pack has been built, simply follow the steps below to adapt the gun, allowing it to fit onto the proton pack side.

Pack contents – 6 x Pins 6 x Holders (2 sets of spares)

### STEP 1 – Removing Existing Panel

Begin by unscrewing and removing the item shown here  
keep the existing screw in a safe location

### STEP 2 – Re-assembling upgrade parts to gun

Take the pin,  
place it through  
the holder and  
then through  
the original  
part

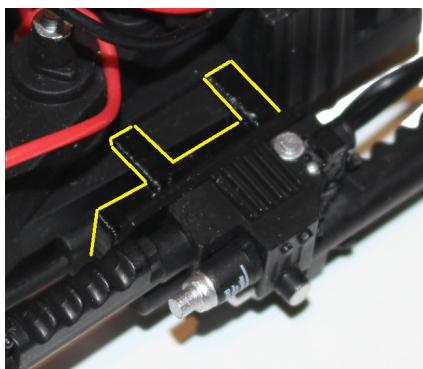

Using a blunt  
tool, push the  
pin into the  
screw hole  
within the gun,  
until all parts  
are tightly  
secured

Completed Assembly

**Fitting tip – The pins do need quite a lot of pressure. However, slice a little off the pin edge if needed.**

### STEP 3 – Stow the gun to the proton pack

The holder now pushes onto the side of the proton pack, as outlined in yellow, left

Congratulations, you've completed the upgrade
